

## ARCHITEXT SOFTWARE

ARCHITEXT SOFTWARE is designed to improve the readability of manuscripts by creating a black and white image, with the text enhanced and background reduced, from your colour digital images. The text on the resulting image can be "floated" over the existing image, to produce a more defined text without affecting the "feel" of the document. The degree of separation is carried out by the eye of the user ensuring that the maximum amount of detail is maintained.

**LATEST RELEASE :-**  
ARCHITEXT MICROFILM CONVERTOR  
Batch convert colour digital images to  
files perfect for writing to film.
