

LOADING SHUTTLE

90 degree book / loading cradle

The addition of a push in pull out shuttle. Has facilitated the handling of heavy bound volumes. Preventing operator injury when combined with our loading trolley. Books can now be taken straight from the repository and loaded on to the camera with the minimum of effort reducing the risk of book damage.

When used in conjunction with a digital camera head, this format book cradle provides support for volumes that will not open fully (not suitable for microfilm)

Specifications (Standard)

To be supplied on application
